Summary

Motivated and results-driven Web Developer with a background in sales and business development. Experienced in building dynamic websites and applications using PHP, MySQL, HTML, CSS, and JavaScript. Successfully developed projects like a Gym Management System and an E-Commerce Website. Previously worked as a Business Development Manager at ICICI Bank and Sales Executive at Bajaj Finserv, excelling in client relationship management and sales growth. Passionate about technology, problem-solving, and continuously improving skills in Laravel, React, and Data Structures & Algorithms.

Education

B.Sc Jul 2019 – Aug 2022
Kolhan University, Chaibasa

MCA Jul 2024 – Continue
Arka Jain University, Jharkhand

Experience

Bajaj Finance Aug 2021 – Aug 2023
Sales Representative

- Worked as a Sales Executive, promoting and selling financial products such as loans and insurance. Responsible for generating leads, meeting sales targets, and assisting customers with product information and applications. Maintained strong client relationships to drive repeat business and ensure customer satisfaction.

ICICI Bank Jan 2024 – May 2024
Business Development Manager

- Managed sales and business development for financial products, including loans and credit services. Generated leads, built strong client relationships, and achieved sales targets. Assisted customers with banking solutions, ensuring excellent service and satisfaction. Collaborated with internal teams to streamline processes and drive business growth.

Achievement

Certification of Web Development

- Successfully completed a certification program in Web Development, gaining hands-on experience in designing and developing websites using HTML, CSS, JavaScript, and other web technologies. Enhanced skills in frontend and backend development, focusing on creating responsive and user-friendly web applications.

Project Detail

Gym Management system

- Developed a Gym Management System to streamline gym operations, including member registration, workout and diet plan management, attendance tracking, and payment processing. Built using PHP and MySQL for backend functionality, with HTML, CSS, and JavaScript for an interactive user interface. The system allows admins to manage memberships, trainers, and schedules efficiently, improving overall gym management and user experience.

E commerce website

- Developed a fully functional e-commerce website with features like product listings, user authentication, shopping cart, order management, and secure payment integration. Built using PHP and MySQL for backend operations, with HTML, CSS, and JavaScript for a responsive and user-friendly frontend. Ensured a seamless shopping experience with dynamic product categories, search functionality, and an intuitive user interface.
